

## 8 day exclusive fishing Safari on the Zambezi river in Zimbabwe

### SIDINDA ISLAND LODGE

Available to our group is 16km of river frontage, from quiet river waters to rapids, undisturbed by nature at its purest. The quick flowing river in the gorge is responsible for very athletic Tiger fish. The Zambezi provides plentiful fish species in this location; over and above Tiger Fish one will find - Barbel, Bream, Giant Vundu, Electric Catfish, Squeaker, Nkupe & Chessa.

The lodge lies approximately 80km downstream from the Victoria Falls, where the Sidinda river meets the Zambezi. Meeting you at Victoria Falls International airport is your English speaking fishing guide, who will accompany you for your entire trip with us. A 90 minute transfer will take you to our cosy lodge, which offers everything a sports fisherman needs and which is booked exclusively for your small group.

Sidinda Island Lodge lies directly on the banks of the Zambezi river; the steep banks of the river offer you undisturbed views of the river, but also keeps the Hippos and crocodiles away from the camp. The four chalets are built on stilts, each chalet providing open views of the river from the terrace. Each chalet has a private bathroom with shower, cooling fans, electricity until 23h00 each night and can be booked as twin or single.

The lodge staff provides a full service to the guest, serves cooled drinks at sunset and around the camp fire in the evenings.
